### CARBON MANAGEMENT STAKEHOLDER ENGAGEMENT PLAN

Oz/Ref: CC-IMS-MAN-10-3-ENG Vrijedi od/Eff Date: 06.02.2023. Stranica/Page: 3 / 12

#### Introduction

International Zagreb Airport Jsc. recognizes that its activities, services and operations have an impact on the environment. International Zagreb Airport is committed to continual improvement by implementing Environmental Management System and continually improve its performance by focusing on carbon management strategy engaging with its stakeholders and pollution prevention. Committed to net zero carbon emissions by 2050 is next step in environment protection.

International Zagreb Airport's Carbon Management Stakeholder Plan is mandatory document as requirement of Level 3 Airport Carbon Accreditation (Optimization) and describes information about stakeholders, their roles and responsibilities, join initiatives, targets, training and awareness with the aim of reducing CO2 emission from activities which the airport can guide and influence.

This Plan will be revised at least every three years or in case of stakeholder's change.

MZLZ is a company registered in Croatia, with 6 shareholders bringing international expertise in the airport development, operation, construction, project management, and structured finance. The Concession includes: Financing, the design and construction of the new airport. Operating the entire airport for close to 30 years, including the runway, passenger terminal, cargo terminal, parking lots and future property developments.

### The airport facilities include:

- ▶ 1 runway (length: 3 252 m width: 45 m)
- > 3 aircraft aprons:
  - 1 new (East) apron dedicated to the Commercial aviation aircraft (49 000 sqm with 8 contact + 3 remote parking stands)
  - 1 (West) apron dedicated to the Commercial Aviation aircraft (83 000 sqm with 13 remote (all) parking stands)
  - 1 apron dedicated to General Aviation aircraft (28 000 sqm with 20 parking positions).
- > 1 passenger terminal (65 000 sqm)
- > 1 cargo terminal (2 100 sqm)

MZLZ Ground Handling Services Ltd was a service provider at Zagreb – Franjo Tuđman Airport for airlines, passengers, group companies and representatives/agents of the airlines. Havas Ground Handling Co. acquires the shares of MZLZ Ground Handling Services Ltd on February 10th, 2022 and the Company name is changed to HAVAS – Ground Handling Services Ltd.

Like its shareholders, MZLZ is fully committed in sustainable development. In addition to the ISO 14001 certification, MZLZ in July, 2022 upgraded from Level 2 Reduction up to Lever 3 Optimisation in carbon emission management.

Turned to the future, the New Passenger Terminal is LEED silver compliant. MZLZ is also a member of Croatian Green Building Council.

Since March 2022, MZLZ has been fully engaged in Green electric energy use.

#### CARBON MANAGEMENT STAKEHOLDER ENGAGEMENT PLAN

MZLZ is proud to share, with this plan, the work of its teams in view of preserving both our current environment and our common future.

### 4. Stakeholders' identification, description, categorisation and prioritisation

At International Zagreb Airport stakeholders are identified based on stakeholder analysis in which they are categorized by influence of their activities on carbon emissions and those that an airport can guide and influence through dedicated plan for carbon emission reduction. ZAG operational structure is divided on operations at airside and landside that has overall control expect activities performed by Government services such as Air Traffic Control services, The Navaids (ILS, glide path...) operations and maintenance, the immigration services, customs services, meteorological services and those under private companies providing retail services, catering services, public and local transportation services, telecommunication services. Zag has a diverse range of stakeholders from government authorities to contractors, passengers, visitors and staff to tenants. We aim to treat all stakeholders fairly, ensuring dedicated programme of dialogue that is timely and transparent.

The main role of every stakeholder at ZAG is their cooperation and engagement on environmental protection. Managing and collecting data and information on monthly basis on their energy, water and fuel consumption is one of the basic monitoring initiatives from Maintenance Methods Department as tool for stakeholder energy consumption. For carbon and other greenhouse emissions from aircraft, ZAG uses Bruel&Kjaer the AirTrak Carbon Manager. This tool shows the tonnes of CO2-e produced each month by all aircraft operation at our airport. This tool is also very useful in identification and prioritisation of stakeholders. Such approach has a positive impact on both sides, with aim to reduce energy consumption, improve data management, decrease expenses, all this with environmentally friendly perspective.

### Baseline year is 2022.

ZAG is committed to engage stakeholders in its energy and carbon planning and strategic development.

ZAG's stakeholders are divided in 5 matrixes by their activities and are categorized into three groups depend on carbon emission results:

Stakeholders that through their activities cause a highest level of carbon emissions results and energy consumption – high priority
Stakeholders that through their activities cause a medium level of carbon emissions energy consumption – medium priority
Stakeholders that through their activities cause a low level of carbon emissions energy consumption – low priority

Oz/Ref: CC-IMS-MAN-10-3-ENG Vrijedi od/Eff Date: 06.02.2023. Stranica/Page: 5 / 12

# CARBON MANAGEMENT STAKEHOLDER ENGAGEMENT PLAN

Stakeholder Matrix also shows stakeholders that ZAG can guide or can influence as key criteria in planning of activities that that will be describe in dedicated plan according to ACI ACA requirements.
